NEW INNOVATION AND ENTERPRISE CENTRE - Brief No. 001

Some of you may have already heard of our ambitious plans for expansion ...

The new Innovation and Enterprise Centre

(working title)

Scheduled to open Summer 2018

The University is at the early stages of planning and designing an iconic building located at the southern end of the Campus nearer to the City Centre and alongside the new multi-storey car park (near to the Edge Gym).

Scheduled to open in the Summer of 2018, the new space will make it easier for you to collaborate with the University so that as well as providing high quality office and lab space, it will host the University's team of professionals who enable access to experts and facilities, together with a range of other organisations working in the innovation space. The University wants to be more proactive and understand your needs so that it can help you achieve your goals.

Collaboration is a central theme so the building will feature a variety of communal and private spaces including a café in which to network, meet, generate ideas, develop projects and present to clients. The University and its partners will deliver an extensive programme of events to meet your needs and attract a wider audience to stimulate collaboration and create a vibrant community.

We hope that you share our excitement for this new venture and perhaps even relocate to it.

We have already passed on to the design team your comments from the recent online survey and will be running a series of information and feedback sessions in the coming months.

This briefing is now available on our website along with location maps and further information in the form of FAQs but please do not hesitate to contact me if you have any questions.

Tracy Robinson, Managing Director, tracy@leedsinnovationcentre.co.uk, 3845845

Leeds Innovation Centre is a subsidiary company of The University of Leeds
